

# WILKEN E-PROCUREMENT

## DIGITAL PROCUREMENT FOR ORGANISATIONS

Organisations in development aid and the social economy feel the pressure to cut costs just the same as other businesses. Procurement often offers the best opportunities for savings, especially when using e-procurement solutions to **optimise procurement processes and behaviour** and **significantly lower purchasing costs**.

This is why the focus of Wilken E-Procurement is on harnessing the possibilities of digital purchasing. The digital and catalogue-based procurement solution organises and optimises the procurement process thereby building transparency among everyone involved.

With Wilken E-Procurement your organisation can make use of a software that supports you throughout the entire purchasing process of ABC-goods. Furthermore, Wilken E-Procurement offers interfaces to the Fundtrac project management

### YOUR BENEFITS:

- ✓ Cost savings through digital procurement
- ✓ Intuitive operation
- ✓ Less need for routine management tasks
- ✓ Paperless and web-based
- ✓ Transparency and oversight throughout the procurement process

software by Wilken Ciwi or other commonly used packages.

The entire purchasing process from the request of an offer to its clearance to the actual order and the booking of the receipt of goods is managed using Smart E-Procurement.

This includes virtual storage management and a lean budget management system. You only need to use the functions you really need – and avoid having to use those common to other solutions but that are irrelevant to your work.

- ✓ Resource savings due to a paperless procurement and clearance process
- ✓ Optimisation of quality and organisational structures through integration in existing systems
- ✓ Workflow-based clearance process

If needed, Wilken E-Procurement can be easily integrated into Wilken Ciwi Fundtrac as a stand-alone system or in combination with various other ERP solutions. If used as a stand-alone package, order creation may also be handled by Wilken E-Procurement.

Moreover, a virtual storage facility (manual or using storage bins) as well as a simple budget management system (individual budgets for groups of persons) is easily configured.

- ✓ Pre-defined order criteria provide room for negotiation with suppliers
- ✓ Rating and qualification of suppliers
- ✓ Comprehensive reporting
- ✓ Worldwide web- and role-based access

## WILKEN E-PROCUREMENT DIGITAL PROCUREMENT FOR ORGANISATIONS
